BEST IN CLASS

~~~~~  
Bureau Monitoring  
ADVISOR

~~~~~  
Newtown Square, PA - December 15, 2008 - Martin & Company announces the development of a new proprietary web-based Bureau Monitoring tool.

Monitoring bureau activity is a necessity for any property and casualty company utilizing bureau rates, rules, and/or forms. It is important to handle bureau materials in a timely manner, but this can be a costly and very time consuming process. Martin & Company's Bureau Monitoring ADVISOR allows you to more effectively manage your costs by saving valuable company time that can be put to use elsewhere.

This dynamic and interactive web-based tool offers:

Review of bureau Circulars/Bulletins on a daily basis (ISO ... NCCI ... Independent Bureaus ... etc.).

Accurate capturing of key and relevant data (State ... Line of Business ... Circular Number ... Status of Circular ... Proposed Effective Date ... Approved Effective Date, etc.).

Detailed data for Bureau Company Action Information, Overview of Circular & Bulletin and Hyperlinks to the Circular/Bulletin.

Administrative Access to upload company specific data that includes Company Action Taken, Company Requested Effective Dates, whether a filing is required, assignment within the company and more!

HUGE BENEFIT ... companies can filter and search at many levels for specific data, as well as export data to an XLS or CSV file for inter-office reports, market conduct resource, training and backup.

Want to get started ... call Martin & Company to setup a profile for selected states and lines of business. This allows you to see the benefits at the initial level of service, then you can arrange for as many states or lines of business you authorize Martin & Company to track\*. Need more information, call Martin & Company to discuss pricing options and timeframe.

Since Martin & Company is an authorized SERFF Third-Party filer, they can also submit filings, perform the appropriate filing action on your behalf (i.e. adopt, non-adopt, or delay), and most important ... incorporate into Bureau Monitoring ADVISOR a link to the filing and the filing status of those submissions for you to track.

~~~~~
